PROFESSIONAL SUMMARY

Computer Science undergraduate skilled in Python, Java, SQL, and machine learning, with experience building data-driven web applications. Strong problem-solving and teamwork skills with clean, efficient code.

EDUCATION

Bachelor of Engineering in Computer Science and Engineering; CGPA: 8.79/10 — **Aug 2023 – May 2027**
Er. Perumal Manimekalai College of Engineering — Hosur, Tamil Nadu

TECHNICAL SKILLS

Programming	: Python, SQL, C, Java
Web & Database	: HTML, CSS, Streamlit, Database Design, Query Optimization
Data Analysis	: Data Cleaning, Preprocessing, EDA, Feature Engineering, Data Visualization, Statistical Analysis
BI & Visualization	: Power BI, Microsoft Excel, Tableau, Power Query, DAX, KPI Dashboards
Machine Learning	: Classification, Logistic Regression, Decision Trees, Random Forest, K-Means Clustering
Libraries & Tools	: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Jupyter Notebook, GitHub, VS Code
Core Concepts	: OOP, SDLC, Debugging, Computer Networks, Cloud Computing, Operating Systems

INTERPERSONAL SKILLS

• Analytical Thinking • Problem-Solving • Teamwork & Collaboration • Willingness to Learn

LANGUAGES KNOWN

• English(Read, Write, Speak) • Tamil(Read, Write, Speak) • Kannada(Speak) • Telugu(Speak)

INTERNSHIP

INTERN AT DEL MONTE FOODS PVT. LTD. — **DEC 2025 – JAN 2026**

- Gained exposure to IT infrastructure, enterprise networking, and manufacturing operations.
- Observed communication between units, centralized data sharing, and information flow.
- Gained exposure to industrial workflows manufacturing technology

Data Science Intern — **June 2025 – July 2025**

SkillCraft Technology

- Performed data cleaning, preprocessing, and EDA on real-world datasets using Python, SQL, and Excel.
- Built and evaluated classification machine learning models for prediction tasks.
- Used Pandas and NumPy to analyze datasets and identify meaningful patterns and insights.

PROJECTS

Customer Churn Prediction Web Application

- Developed a machine learning web application to predict customer churn and support retention analysis.
- Cleaned and prepared customer data using preprocessing, EDA, and feature selection techniques.
- Applied classification algorithms to identify customer behavior patterns and predict churn probability.

Technologies: Python, Streamlit, Scikit-learn, Pandas, NumPy

AI-Based Urban Heat Prediction & Cooling Recommendation System

- Developed an interactive dashboard to predict urban heat conditions using machine learning.
- Applied data preprocessing and feature engineering to prepare environmental data for prediction.
- Integrated interactive maps and an AI chatbot to provide personalized cooling recommendations.

Technologies: Python, Streamlit, HTML, CSS, Machine Learning

CERTIFICATIONS & ACHIEVEMENTS

- AI Dashboards using Power BI — Microsoft / Power BI Community
- Microsoft Excel using AI Workshop — Skillsoft
- Presented AI-Based Urban Heat Prediction project at Project Expo 2026
- Secured 1st Place in App Development Competition at college; participated in multiple hackathons
